

Mr. David Alberg  
Sanctuary Superintendent  
100 Museum Drive  
Newport News, Virginia 23606

19 March, 2016

I am totally endorse an expansion of NOAA endeavors along the North Carolina and hopefully Virginia coastlines. I have had the unique experience of having NOAA support a maritime archeology project which I have lead and I can honestly say that I have encountered few governmental entities who provide the stewardship of our rare and unique maritime resources which they ensure. I believe that all of the options and proposals are realistic and feasible. I particularly support proposals D and C which appear the more comprehensive and inclusive. In reality were it able I would support a proposal which would encompass both proposals into one providing the maximum protection oh the historical and environmental resources along these coastal areas.

I would also support any expansion which might provide this protection to inner coastal waters to include river, tributaries and sounds.

If I can provide any further comment in support of this effort please feel free to contact me.
